PROJECTS

Web Design for Freelance Teaching Platform –(link)

Led the design team in creating a dynamic and user-friendly interface for Skill-Lama, a freelance teaching platform. Developed responsive web designs that facilitated seamless interaction between students and tutors on various devices. Implemented user research insights to optimize navigation, usability, and engagement across the site. Worked closely with development teams to ensure accurate design implementation and functionality.

Fundamental Analysis of Cash Flow Using ML

Spearheaded the development of a user-friendly ML model, enabling non-financial individuals to make sound investments Implemented ML algorithms for the Discounted Cash Flow (DCF) model, ensuring robust stock analysis. Enabled safe equity investments through calculated intrinsic values. Designed a user-friendly interface tailored for non- financial. Incorporated risk assessment, identifying low-risk investment opportunities.

EXTRA-CURRICULAR ACTIVITIES

- Certified classical singer by Gandharv Mandal (Level-3) (Maharashtra)
- I love learning and understanding valuation and cashflow.
